Comment 4e West Windsor Township Environmental Impact Statement work sheet or requested reason for waiver.

Response: Respectfully request a waiver to provide a completed West Windsor Township Environmental Impact Statement work sheet. The worksheet appears to request information pertaining to new and extensive site designs. The Applicant's site has been established for many years and there is little to no impact on the surrounding area. There are no improvements directed to utilities, parking, landscaping, and use of the existing building. The purpose of the site improvements consisting of a proposed porch with sidewalk and new shed is to provide respite and improve the aesthetics of the rear yard area. Many of the questions are not applicable to the site.

Comment 4f West Windsor Township Green Development practices checklist or requested reason for waiver.

Response: Respectfully request a waiver to provide a completed West Windsor Township Green Development practices checklist. The Applicant's site has been established for many years and the increase of impervious is di minimus at only 500 square feet. The drainage flow patterns will remain unchanged and spashblocks will be installed at the roof drains where none existed before. There will be a new white vinyl buffer fence along the rear property line and no new landscaping is being proposed. Most other items in the Checklist are not applicable to such a small project.
